# Unit 1: Effects of urban environments on animals

# Introduction

10).....

| Red  | cent urban developments represent massive environmental changes. It was previously thought |
|------|--|
| tha  | t only a few animals were suitable for city life, e.g.                                     |
| •    | the 1) because of its general adaptability   |
| •    | the pigeon - because walls of city buildings are similar to 2)                             |
| In f | fact, many urban animals are adapting with unusual 3)                                      |
| Re   | cent research  |
| •    | Emilie Snell-Rood studied small urbanised mammal specimens from museums in Minnesota.      |
|      | - She found the size of their 4) had increased.  |
|      | - She suggests this may be due to the need to locate new sources of 5) and to deal         |
| wit  | h new dangers.   |
| •    | Catarina Miranda focused on the 6) of urban and rural blackbirds.                          |
|      | - She found urban birds were often braver, but were afraid of situations that were         |
| 7)   |  |
| •    | Jonathan Atwell studies how animals respond to urban environments.                         |
|      | - He found that some animals respond to 8) by producing lower levels of hormones.          |
| •    | Sarah Partan's team found urban squirrels use their 9) to help them communicate.           |
| Lo   | ng-term possibilities  |
| Spe  | ecies of animals may develop which are unique to cities. However, some changes may not be  |

# **Unit 2: The history of weather forecasting**

# **Ancient cultures**

| •   | many cultures believed that floods and other disasters were involved in the creation of the |
|-----|---|
| WO  | rld   |
| •   | many cultures invented 1) and other ceremonies to make the weather gods                     |
|     | friendly  |
| •   | people needed to observe and interpret the sky to ensure their 2)                           |
| •   | around 650 BC, Babylonians started forecasting, using weather phenomena such as 3)          |
| •   | by 300 BC, the Chinese had a calendar made up of a number of 4) connected with              |
| the | weather   |
| An  | cient Greeks  |
| •   | a more scientific approach  |
| •   | Aristotle tried to explain the formation of various weather phenomena                       |
| •   | Aristotle also described haloes and 5)  |
| Mi  | ddle Ages   |
| •   | Aristotle's work considered accurate  |
| •   | many proverbs, e.g. about the significance of the colour of the 6) passed on accurate       |
|     | information.  |
| 15t | h-19th centuries  |
| •   | 15th century: scientists recognised value of 7) for the first time                          |
| •   | Galileo invented the 8)   |
| •   | Pascal showed relationship between atmospheric pressure and altitude                        |
| •   | from the 17th century, scientists could measure atmospheric pressure and temperature        |
| •   | 18th century: Franklin identified the movement of 9)  |

19th century: data from different locations could be sent to the same place by 10).....

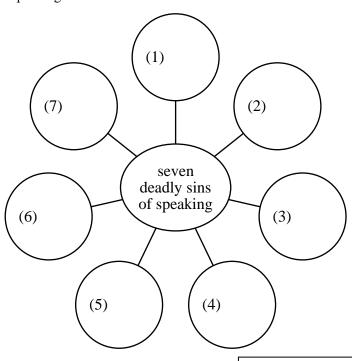

# **Unit 3: An Alternative Solution to Plastic Pollution—Bacteria**

| Pro | blem   | ns .  |
|-----|--------|---|
|     | >      | Since plastic is tough and durable, it takes up to 1) to fully break down.    |
|     | >      | Plastic leaches harmful 2) into the environment.                              |
|     | >      | Plastic is cheap, durable, 3) and everywhere.                                 |
| Pos | sible  | solution:   |
|     | >      | Bacteria live in all sorts of 4) environments.                                |
|     | >      | They are creative with their 5)   |
| 6)_ |        |   |
|     | >      | Could bacteria in plastic-polluted environments have plastic for food?        |
| Res | searc  | h methods   |
|     | >      | Collecting 7) teeming with bacteria from Houston;                             |
|     | >      | Feeding the bacteria with 8) without other food;                              |
|     | >      | Investigating if the bacteria could 9)  |
| Res | searc  | h results   |
|     | >      | With a special enzyme, bacteria digest PET plastic into 10) and then use for  |
|     |        | 11)   |
|     | >      | They 12) the plastic polluted environment and evolve the ability to           |
|     |        | 13)   |
| Dis | cussi  | on  |
|     | >      | Only 14) of plastic winds up being recycling, which is not enough for plastic |
|     |        | pollution problem.  |
|     | >      | Bacteria are naturally occurring and they do not pose 15) to human beings.    |
| Fut | ture o | lirection   |
| >   | Spe    | reding up the digestion process with 16);                                     |
| >   | Cre    | ating an 17) carbon free system where bacteria live with 18) as               |

the only food source

# **Unit 4: How Can We Speak Powerfully?**

1) Seven deadly sins of speaking:

2) Four powerful foundations to make our speech powerful:

|             | (1)                                       |
|-------------|---|
| H Honesty   | Being yourself.                           |
| (2)         | (3), actually doing what                  |
| I Integrity | you say, being somebody people can trust. |
|             | Wish people well.                         |

Being

in

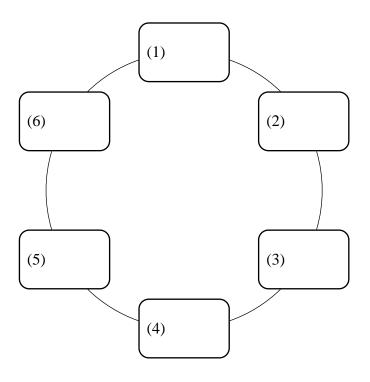

true

what

you

say,

3) A few tools to increase the power of your speaking:

# **Unit 5: Spend Time on What Matters**

Watch section 1 of the video and decide whether the following statements are true or false (circle the right answer). Correct the wrong one.

1) The speaker is always on time. (True / False)

If it is false, the truth is \_\_\_\_\_

| 2) Th                            | e speakei   | has lots of tips and tricks for saving ti | me. (True / False)  |
|----------------------------------|-------------|---|---|
| If it is                         | s false, th | e truth is                                |   |
| 3) We                            | build th    | e lives we want by saving time. (Tru      | e / False)  |
| If it is                         | s false, th | e truth is                                |   |
|                                  | guments     | s. Listen and write down the details      | busy women are told to support the in the following chart. Share your |
|                                  |             | The first woman                           | The second woman  |
| What happened                    | Time        | 1)  | 2)  |
| to her?                          | Event       | 3) She usedhours to                       | 4) She refused to talk with the                                       |
|                                  |             | deal with the mess because                | speaker because   |
| How can we                       | e<br>e      | 5) Time is highly elastic, so we can      | 6) Time is a choice, so we have the                                   |
| manage tim                       |             | find time to do the                       | power to fill our lives with the                                      |
| on the lessons learnt from these |             | ind time to do the                        | things that   |
| anecdotes?                       |             |   |   |
| Watch section                    | on 3 of th  | e video and fill in the gaps below.       |   |
|                                  |             | How to Treat our Prioriti                 | es?   |
| First, 1)                        |             | what they are.                            |   |
| <b>≻</b> T                       | wo strate   | oies.                                     |   |
| , 1                              | W O Bilace  | 5.401                                     |   |
| <b></b>                          | The fir     | st is on the 2) side. Give your           | self 3)now  |
|                                  | instead     | of at the end of the year.                |   |
| <b></b>                          | The se      | cond is about your 4) life.               | Write down 3-5 5)   |
|                                  |             |   | 7   |

things now on your next year's family holiday letter.

| Next, break them down into 6) steps. |  |  |
|--------------------------------------|--|--|
| >                                    | Two examples   |  |
|                                      | ♦ To write a family history, first read some other family histories to go        |  |
|                                      | 7), then think about some questions and interview you                            |  |
|                                      | 8)   |  |
|                                      | ♦ To run a 5K, first find a race and sign up, then get a 9), and get             |  |
|                                      | everything ready.  |  |
| Then, the                            | e key is to put priorities into our 10) first.                                   |  |
| >                                    | To find a good time to do this: Friday afternoons, which is called a 11)         |  |
|                                      | time.  |  |
| >                                    | To make a three-category priority list: 12), relationship and self.              |  |
| >                                    | To look out over the whole of the next week, and see where you can plan them in. |  |

# Watch section 4 of the video and choose the best answer to summarize the main idea of this part.

- a. Even though working time takes up the largest part of a 168-hour week, we can still find time to do what we want to do.
- b. We can always find time to do what matters most to us in a 168-hour week and use bits of time to get bits of joy.

# **Unit 6: EDUCATIONAL REVOLUTION**

| >   | Lea     | d-in  |
|-----|---------|---|
|     | <b></b> | Speaker's observation 1: In any class, there is always someone who is (1)                     |
|     |         | than the teacher  |
| for | exam    | ple, the Lancaster bomber and the C-19 Globemaster III story                                  |
|     | <b></b> | Speaker's suggestion: A teacher should (2) around students, and put the                       |
|     |         | students (3) of their learning.   |
|     | <b></b> | Speaker's observation 2: Educational policy or rules around (4) and                           |
|     |         | comparing students and schools can end with tears in students' eyes.                          |
|     |         | for example, a crying boy sitting for a NAPLAN test.  |
|     | <b></b> | <b>Speaker's suggestion:</b> Teachers need to stop thinking of the students as empty vessels. |
| >   | De      | fining "education" in Latin:  |
|     | <b></b> | to (5) or to mold students  |
|     | <b></b> | to guide or to (6) students   |
| >   | Pro     | oblem with "education" in reality: focus on the academics, but miss out on the (7)            |
|     |         | , such as love, empathy, compassion, understanding.   |
| >   | Th      | e way to solve the problem:   |
|     | <b></b> | The Montessori way: to do with the classroom or the (8)                                       |
|     |         | In class:   |
|     |         | to allow students to (9) (Provide <u>one</u> example).  |
|     |         | In this way, students can develop (10)  |
|     |         |   |

Students will become more (11) \_\_\_\_\_\_to change.

|   | e.g., their performance in the Covid-19 pandemic situation.                  |
|---|--|
|   | At home  |
|   | to allow students to (12) (Provide <u>one</u> example).                      |
|   | to allow students to make mistakes, which will be great avenues of learning. |
| > | Conclusion   |
|   | Real education does not only educate the mind, but also the (13)             |
|   | e.g., Oliver and Oscar's story.  |

### **Unit 7: Getting Executive Function Improved**

# What is executive function: Ability to consciously 1) thoughts, emotions and actions in order to 2) . Why executive function matters: It predicts all kinds of good things like social skills, 3) achievement, mental and physical health. How to improve executive function Wrong way: 4) such as games or playing chess Correct way: using executive function in context Supporting Test 1: Dimensional change 5) test Purpose: To explain the effects of 6) on executive function Procedure: Young child was required to sort the same cards 7) or by color. Result: The child succeeded in putting the card in the correct box when 8) but failed when by shape. Conclusion: Children need to 9) \_\_\_\_\_ from one situation to another Supporting Test 2: Marshmallow tests as a measure of delay of 10) Purpose: To explain how executive function is influenced by 11) \_\_\_\_\_, peers and strategies used. Procedure: Children were divided into two group one of which waited for 12) while another did not. Results: The children who believe they would get more are more 13) Children would generate some strategies to 14) \_\_\_\_\_, such like sitting on their hands, 15) \_\_\_\_\_ from marshmallow or singing a song. **Implications** ✓ Change 16) around. ✓ Make 17) \_\_\_\_\_ matter.

✓ Employ some 18) \_\_\_\_\_\_ in specific context.

# **Unit 8: Teach Girls Bravery, Not Perfection**

| Leac | d-in: The speaker's story   |
|------|---|
| •    | She used to work as a 1), and an organizer, wanting to run for Congress in her                    |
|      | heart.  |
| -    | The polls said she was 2)   |
| -    | Her 2012 run  |
|      | ➤ had the support from the media; raised 3) form people   |
|      | > only got 4) of the vote; being said to waste money  |
| -    | This is the first time in her life that she'd done something that was 5) without                  |
|      | worrying about being 6)   |
| Body | <u>v:</u>   |
| -    | many women play safe in their career  |
|      | > most girls are taught to avoid 7) vs. Boys are taught to play 8)                                |
|      | and take risks  |
|      | In Silicon Valley: no one takes you seriously unless you've failed two 9)                         |
| -    | The speaker worries about the bravery deficit   |
|      | ➤ It is why women are 10) in STEM, in C-suits, etc.   |
| •    | The Study by Prof. Dweck  |
|      | > bright girls were quick to 11) when being given rather demanding tasks                          |
| VS.  |   |
|      | > bright boys found the difficulty task to be a 12); found it empowering                          |
| •    | This is not a question of ability, but their attitude towards challenge. Another relevant example |
|      | from HP:  |
|      | > men go for a job if meeting 13) of the qualifications   |
|      | > women will apply the job only if they meet 100% of the qualifications                           |
| •    | All these show that women have been 14) to pursue perfection, and they are 15)                    |
|      | Thus, they are left behind in the tech industry and the economy will also be                      |

■ #Girls Who Code Company#

affected.

|      |             | Teaching girls to code will socialize them to be brave.                                    |  |
|------|-------------|--|--|
|      | >           | Coding is a non-stop process of 16)  |  |
|      | >           | Coding requires 17) and imperfection.  |  |
|      | >           | Rather than show the 18) that the girls themselves made, they'd show                       |  |
| notl | ning        | at all→perfectionism→just teaching them to code is not enough!                             |  |
|      | We          | should teach girls to be brave and build a supporting 19) cheering them on.                |  |
| •    | The         | en girls can do marvelous things:  |  |
|      | >           | two high school girls build a game Tampon Run.   |  |
|      | >           | A Syrian refugee building an 20)   |  |
|      | >           | A 16-year-old girl built an 21)to detect cancer  |  |
| Coı  | Conclusion: |  |  |
| •    | Wo          | rk together to socialize girls to be comfortable with 22)                                  |  |
| •    | We          | should show girls that they are loved and accepted not for being perfect but for being 23) |  |
|      |             |  |  |
|      | Thi         | s will make the world a better place for each one.   |  |

Unit 9: Deep sea

Watch section 1 of the lecture video and then look at the notes taken below.

| Script 2  |
|---|
| What I learned from spending 31 days  |
| What I learned from spending 31 days underwater (Section 1)   |
| 1. Leasons I live at the bottom of sea  |
| a curious about the world   |
| 1. Leasons I live at the bottom of sea  A. curious about the world  B. only explored 5% of ocean                            |
| 11. Preparation before living underwater  |
| 111. Observed different animals and critters  a. observe animals closely for a long time  B. study animals we've never seen |
| a observe animals closely for a long time   |
| B. study animals we've never seen   |
|   |

Now, it is your turn to continue listening to the rest of the lecture (section 2) and then take notes.

# Watch the talk again and then use your notes to fill in the outline below.

Deep Sea Research (section 2)

| A numbe   | er of scientific studies were carried out   |
|-----------|---|
| >         | A PAM was used to study 1), which could indicate the pollutants in                    |
|           | water.  |
| >         | A sonde was used to test metabolism rates, to understand what's happening underwater, |

# **Unit 10: Want to Learn Better? Start Mind Mapping**

# **Definition**

| Mir | nd mapping is a method you use to take notes and help your 1.                 |  |  |  |  |  |  |  |  |
|-----|---|--|--|--|--|--|--|--|--|
| Ke  | y features of a handwritten mind map  |  |  |  |  |  |  |  |  |
| ✓   | It is very <u>2.</u> and you use <u>3.</u> (e.g., hands, arms, etc.).         |  |  |  |  |  |  |  |  |
| ✓   | You start from the topic in the center and build out 4                        |  |  |  |  |  |  |  |  |
| ✓   | It is <u>5.</u> : People's mind maps of the same talk/book can be different.  |  |  |  |  |  |  |  |  |
| ✓   | You put down single words or short phrases rather than <b>6.</b>              |  |  |  |  |  |  |  |  |
| ✓   | It works like the 7. works.   |  |  |  |  |  |  |  |  |
| Wh  | y is it important   |  |  |  |  |  |  |  |  |
| ✓   | A tool to apply in all kinds of <b>8.</b> and subjects                        |  |  |  |  |  |  |  |  |
| ✓   | A strategy to work with our brain, rather than against it                     |  |  |  |  |  |  |  |  |
| ✓   | Keywords 9. bigger ideas  |  |  |  |  |  |  |  |  |
| ✓   | Being used in both 10. and business meetings                                  |  |  |  |  |  |  |  |  |
| Ho  | w to mind map   |  |  |  |  |  |  |  |  |
| ✓   | Take out a piece of paper and put it 11. And ignore the lines.                |  |  |  |  |  |  |  |  |
| ✓   | Write down keywords, short phrases, and the connections between them.         |  |  |  |  |  |  |  |  |
| ✓   | Develop your 12. radially.  |  |  |  |  |  |  |  |  |
| ✓   | Go back and forth completely 13.  |  |  |  |  |  |  |  |  |
| ✓   | Do not blindly document or 14. something.                                     |  |  |  |  |  |  |  |  |
| ✓   | Think about how does it <u>15.</u> , how does it work and how to remember it. |  |  |  |  |  |  |  |  |

# **Unit 11: The Power of Introverts**

| Flas   | shback: chi   | ildho  | od summer camp experience   |  |  |  |  |  |  |  |
|--|---|--|---|--|--|--|--|--|--|--|
| >  | In the spea   | In the speaker's family, reading together and 1 around the adventureland   |   |  |  |  |  |  |  |  |
|  | in one's m  | ind w  | as the primary social activity.   |  |  |  |  |  |  |  |
| >  | But the summer camp emphasized group spirit and encouraged every girl to be   |  |   |  |  |  |  |  |  |  |

# **Unit 12: How to Become a Critical Thinker**

| Def | inition of critical thinking   |
|-----|--|
| •   | The tendency to think about the world critically comes from having the 1.    |
| •   | It is a personality trait rather than a skill.                               |
| •   | There is no quick 2. to become a critical thinker, but some habits to build. |
| Six | traits related to critical thinking  |
| •   | Open and 3.  |
| •   | <u>4.</u>  |
| •   | Flexibility  |
| •   | A 5. to seek reason  |
| •   | A desire to be well-informed   |
| •   | A respect for and willingness to <u>6.</u>                                   |
| Sev | ren habits to become a critical thinker                                      |
| No  | 1 Read a lot and read widely.  |
| •   | Be exposed to unique viewpoints: a good way to 7. and stay open-minded.      |
| •   | Be exposed to extensive reading: having multiple problem-solving skills and  |
|     | <u>8.</u>  |
| No  | 2 Don't jump to conclusions.   |
| •   | Never conclude in the <b>9.</b> of data.                                     |
| •   | Only judge after studying in depth.  |
| •   | Justify you position with 10.  |
| No  | 3 Create systems not goals.  |
| •   | A system can be measured, refined and 11.                                    |
| •   | A goal only focuses on 12.   |
| No  | 4 Argue with yourself.   |
| •   | Try to 13. routinely and intelligently.                                      |
| •   | Go back and forth until only the most 14. and strongest argument (truth)     |
|     | exists.  |

| No.5   | Be | willing | to | change | vour | opinion. |
|--------|----|---------|----|--------|------|----------|
| - 1010 |    |         | •• |        | J    | ob       |

- Be <u>15.</u> to information.
- Have the willingness to change your opinion with better data.

# No.6 Write.

- Writing is thinking.
- It helps 16. what you actually know from what you think you know.

# No.7 Seek <u>17.</u>

- This is 18. but most powerful.
- It generates 19. that drives you into active thinking modes.
- Don't live defensively, but attack life.

# Conclusion

- Great thinkers constantly **20.** critical thinking in their daily lives.
- Schools should foster the environment of critical thinking.
